

Study on Cropping Scheme

Mirza Hasanuzzaman, PhD
Professor
Department of Agronomy
Sher-e-Bangla Agricultural University
Email: mhzsauag@yahoo.com

Concept

Cropping scheme is a statement prepared in advance of cropping, and it contains the item-wise estimated cost of different crops in different farm plots. It also contains the expected outcome against each plot of different crops with their value in the expected market price.

Objectives

- Cropping scheme helps mainly to manage a farm to produce crops efficiently and economically following the cropping pattern.
- It helps to estimate the capital and inputs to be required for crop production taking ideas from previous crops.
- It helps in the timely application of inputs and different operations.

Exercise:

Prepare a cropping scheme for Rabi season 2025, in plot no. 5 and 10 of Block – A covering an area of 1 ha of the land of SAU farm.

Farm: Sher-e-Bangla Agricultural University
Sher-e-Bangla Nagar, Dhaka-1207
Season: Rabi, 2025-2026

Proforma of Cropping Scheme

Sl. No.	Block No.	Plot No.	Area (ha)	Name of the crops grown in the previous 4 years								Preceding year crops				Cost involved						Proposed crops		Cost involved						Products (Tk)	Byproduct (Tk)	Remarks*
				2021		2022		2023		2024		Name of crops	Value (Tk)			Laborer	Bullock pair	Seed (Tk)	Manures & fertilizers (Tk)	Miscellaneous (Tk)	Total cost (Tk)	Experimental/ Non- experimental	Name of the crop	Laborer	Bullock pair	Seed (Tk)	Manures & fertilizers (Tk)	Miscellaneous (Tk)	Total cost (Tk)			
				Rabi	Kharif	Rabi	Kharif	Rabi	Kharif	Rabi	Kharif		Products	By products	Total value
